

Turn up the savings with **BONUS INCENTIVES** on energy-saving variable frequency drives

Focus on Energy is offering promotional incentives when you purchase and install variable frequency drives (VFDs) on qualifying motor applications between May 1 and October 31, 2009. Refer to the standard application form for full requirements.

Standard incentive: \$50/hp, up to 30% of project cost

Special limited-time incentive: \$75/hp, up to 50% of project cost

To calculate your **BONUS** tune-up incentive:

A. Connected motor horsepower _____ hp x \$75/hp = \$

B. VFD project cost = \$ _____ x 50% = \$

Total incentive (lesser of A or B above) = \$

How to apply

Fill out this coupon and attach it to a completed standard Variable Frequency Drive Incentive Application for retrofit projects or a New Construction Incentive Application for new construction projects. Coupons received without a **completed** application will be returned. All requirements on the standard form apply. Submit a copy of a paid itemized invoice with your application. You can download a copy of the form from the Focus on Energy Web site at focusonenergy.com/financialincentives. Submit all information to Focus on Energy.

Hurry, offer ends **October 31, 2009!**

Work must be completed and applications received or postmarked between May 1 and October 31, 2009. For more information about Focus on Energy's VFD promotion, call Focus on Energy at 800.762.7077 or visit focusonenergy.com/vfdpromo.
