Combustion Safety Report

Natural draft combustion appliances have the potential to spill exhaust gases into the home. These exhaust gases may contain deadly Carbon Monoxide (CO). Consultants perform tests to make sure that combustion gases are venting up the chimney properly, and that the operating CO level is within guidelines.

CO Test **Heating System** **Water Heater** **Other**
 Pass Fail Pass Fail Pass Fail
Draft Test Pass Fail N/A Pass Fail N/A Pass Fail N/A

We strongly recommend the following course of action(s): _____

Periodically, Focus on Energy evaluates program energy savings by monitoring energy use prior to and after home improvements. Your signature provides Focus on Energy approval to obtain energy consumption data directly from your utility company. If you prefer not to grant Focus on Energy access to your energy consumption records, please check the "Opt Out" box. Opt Out

Homeowner Signature _____ Date _____ Home Performance Consultant Signature _____ Date _____

Eligibility for Focus on Energy programs is determined by a customer's electric and natural gas utility. Use the following participating electric and gas utility list to verify whether a customer is eligible for one or more Cash-Back Rewards through the Home Performance with ENERGY STAR® Program.

Participating Electric Utilities

Algoma Utilities	Hustisford Utilities	Reedsburg Utility Commission
Alliant Energy	Jefferson Utilities	Rice Lake Utilities
Argyle Electric & Water Utility	Juneau Utilities	Richland Electric Cooperative
Bangor Municipal Utility	Kaukauna Utilities	City Utilities of Richland Center
