High Efficiency Boilers

General Requirements for High Efficiency Natural Gas Boiler Rewards:

- Boiler must have an annual fuel utilization efficiency (AFUE) of 95 percent or greater.
- Boilers must have an input capacity less than 300 MBTUH (Thousand British Thermal Units per hour).
- Boilers must have a modulating burner and include an integrated outdoor-air reset control.
- Boilers must be a sealed combustion unit.
- Must be customer of participating natural gas utility and use natural gas for home heating. Boilers must be the primary heating source for the home’s living space.
- Chimney liners must be installed where a high-efficiency gas boiler replaces an atmospherically-drafted boiler and only a water heater remains vented through the chimney. The interior opening left by the removed boiler must be closed with a metal cap and sealed with caulk or mortar.

Tier 1 Incentive: $400

Tier 2 Incentive: $550

An Indirect Water Heater Incentive of $100 or $150 is available when the indirect is installed at the same time as a qualifying boiler. The indirect must be the primary source of domestic hot water for the home. Boilers with integrated domestic hot water production can qualify for the Natural Gas Combination Boiler Incentive of $500 or $675.

The following models have been verified as eligible for this reward by Focus on Energy. Additional requirements apply. Please visit the Residential page for complete details and to verify eligibility.
