

## Heating & Cooling Improvements

### Natural Gas Boilers

#### Efficiency: AFUE ≥ 95%

##### Qualifying Products List

March 10, 2021

#### HIGH EFFICIENCY BOILERS

##### General Requirements for High Efficiency Natural Gas Boiler Rewards:

- Boiler must have an annual fuel utilization efficiency (AFUE) of 95 percent or greater.
- Boilers must have an input capacity less than 300 MBTUH (Thousand British Thermal Units per hour).
- Boilers must have a modulating burner and include an integrated outdoor-air reset control.
- Boilers must be a sealed combustion unit.
- Must be customer of participating natural gas utility and use natural gas for home heating. Boilers must be the primary heating source for the home's living space.
- Chimney liners must be installed where a high-efficiency gas boiler replaces an atmospherically drafted boiler and only a water heater remains vented through the chimney. The interior opening left by the removed boiler must be closed with a metal cap and sealed with caulk or mortar.

**Tier 1 Incentive: \$400**

**Tier 2 Incentive: \$550**

An **Indirect Water Heater Incentive of \$100 or \$150** is available when the indirect is installed at the same time as a qualifying boiler. The indirect must be the primary source of domestic hot water for the home. Boilers with integrated domestic hot water production can qualify for the **Natural Gas Boiler and Indirect Water Heater Incentive of \$100 or \$150** or **Natural Gas Combination Boiler Incentive of \$500 or \$675**.

The following models have been verified as eligible for this reward by Focus on Energy. Additional requirements apply. Please visit the Residential page for complete details and to verify eligibility.
